

# Intro Breakout

## Mobile Payments & Remote Ordering

Amad Ebrahimi

Saturday, April 16 – 1:15-2:30 p.m.

# Fun Fact

My first time presenting

# Who am I? Why Should You Listen to Me?

- Founded Merchant Maverick in 2009
- Spent hours researching companies and testing systems
- Started with merchant accounts, moved into POS, mobile payments, etc...
- Helped thousands of businesses find solutions
- Cloud-based and iPad-based expertise
- Still learning about a changing industry

# The Landscape

- Evolving quickly
- Very fragmented
- Mergers and acquisitions
- Entire companies going under
- Apps/services don't play well with each other
- New products hard to understand
- Merchants are confused, need guidance

# Mobile Point-of-Sale (mPOS)

# 54M

*“Global mPoS installed base to quadruple to 54 million units by 2019.”*

-451Research.com

# Mobile Point-of-Sale (mPOS)

## Opportunities

- Lower cost than legacy systems
- Easier to deploy than legacy systems
- Added features
- App extensions and integrations
- Not just for micro-merchants
- Improved efficiency in QSR's and full-service restaurants

## Pitfalls

- Merchants don't know who to choose
- Merchants don't know who to trust
- Spotty internet connections
- Lack of widescale integrations
- Withheld funds and closed accounts (Square, Paypal Here)

# Mobile Processors

## Pros

- Cloud-based/tablet-based
- Easy application process
- No fixed fees
- Added features
- App integrations

## Cons

- Account instability
- High transaction rates
- Industry instability
- Below avg phone support

# Square

- Feature-rich
- User-friendly
- Simple application process
- Multiple integrations (Xero, QB, Intrakr, Fresh KDS, Caviar)
- Software + merchant account
- No monthly fees/No incidental fees
- Negotiable rates (over \$250K/yr)
- NFC/EMV enabled
- Offline processing mode
- Seller community
- Withheld funds/frozen accounts (mostly w/ high-risk merchants)
- Poor telephone support (use Twitter)
- Best for food trucks, kiosks, QSR's

# Square Partnerships

Help businesses grow faster.

Let's work together. Join free and empower sellers of all kinds with powerful tools to start, run, and grow their business.

## Education and innovation

Empower your customers with educational materials, sales and support services, and exclusive access to new products.

## Cobranded website

Add a custom website and lead form to your toolbox. Send customized messaging and easily track sign-ups online.

## Financial incentives

Qualifying partners receive compensation for implementing Square solutions for their clients' businesses.

Apply today to partner with Square.

[PARTNER WITH SQUARE](#)

# Traditional Processors w/ Mobile Solutions

## Pros

- Lower transactions rates
- Account stability
- Better phone support

## Cons

- Thorough application process
- Fixed monthly
- Incidental fees
- Early termination fees
- Lack of features

# Clover Mobile

- Basic features
- Large app marketplace (add-on services)
- Cloud syncing
- User friendly
- Account stability
- Negotiable processing costs
- NFC/EMV enabled
- Proprietary (First Data)
- No offline processing for credit card transactions
- Best for QSR's, and full-service restaurants (combined w/ Clover Station)

# POS Systems

## Pros

- Processor agnostic
- Cloud-based/tablet-based
- Richer built-in feature set
- Better customer support

## Cons

- Fixed monthly fees
- Requires separate merchant account

# Shopkeep

- Feature-rich
- Easy-to-use
- Low monthly fee (\$59/mn)
- Excellent customer support
- Integrates w/ multiple processors
- In-house payments
- Offline mode
- NFC/EMV enabled
- Best for QSR's, coffee shops

# Mobile Point-of-Sale (mPOS)

## Design, Implementation, and Deployment

- Ask for feature/function requirements
- Determine necessary integrations
- Good internet connection? Offline processing capabilities
- Demo systems (free trials)
- Invest in durable tablet cases and stands
- Who is the current processor?
- Understand processing limits
- Communicate with processor
- Keep consistent processing patterns

# Remote Ordering

“Online orders are expected to surpass offline orders sometime within the next decade.”

- TechCrunch

\$38B

*“Mobile order-ahead is still in its early days, but will be a \$38 billion industry by 2020, accounting for 10.7% of total QSR industry sales.”*

-Business Insider

# Remote Ordering

## Opportunities

- New revenue stream
- Service add-ons (delivery, marketing, menu optimization, etc...)
- Customer insights and analytics
- Custom mobile apps

## Pitfalls

- Fragmented market
- Market instability
- Logistical problems
- High commissions by food delivery services
- Lack of widespread integrations
- POS systems lack built-in online ordering

# Single-App Aggregators

## Pros

- Helps with discovery
- Added services (delivery, support, marketing, etc...)

## Cons

- Too many to choose from
- Too many to manage
- Here today, gone tomorrow
- Lack of POS integration
- High-commissions (5-15%)

The Seamless logo consists of a solid red square with the word "seamless" written in white lowercase letters.The Doordash logo includes a red icon of a winged wheel above the word "DOORDASH" in red uppercase letters. Below it, the tagline "delightful delivery" is written in a smaller, lowercase font.The Zuppler logo features the word "zuppler" in a lowercase, rounded font. The "z" is black, and the "uppler" is orange. A small trademark symbol is at the end.The EatStreet logo has a green square icon with a white fork on the left, followed by the word "EATSTREET" in a grey, sans-serif font.The Just Eat logo is a red rounded rectangle containing the words "JUST EAT" in white uppercase letters. Below it, the tagline "Order takeaway online" is written in a smaller white font.The GrubHub logo features the word "GRUBHUB" in a bold, red, sans-serif font.The Caviar logo features the word "caviar" in a lowercase, orange, sans-serif font.

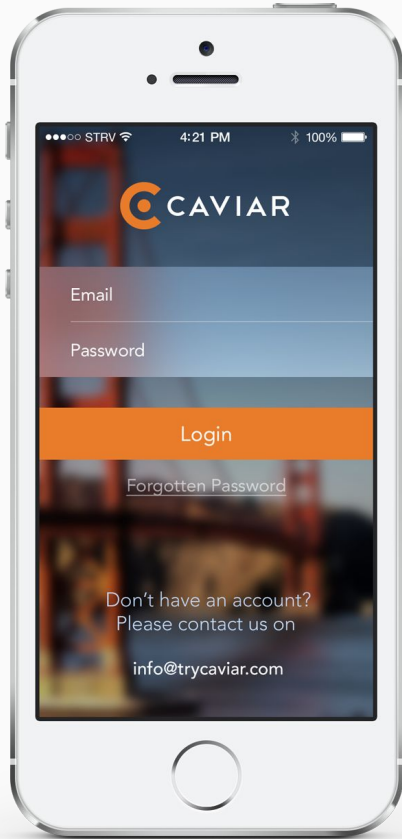

POSTMATES

The Eat24 logo is a red rounded rectangle containing the words "EAT24" in white uppercase letters. Below it, the Yelp logo is written in a smaller white font.The OrderAhead logo features a black square icon with a white fork on the left, followed by the words "OrderAhead" in a black, sans-serif font. Below it, the word "foodler" is written in a red, lowercase, sans-serif font.The Delivery.com logo features the word "delivery.com" in a blue, lowercase, sans-serif font. Below it, the tagline "Your neighborhood. Delivered." is written in a smaller, black font.

# GrubHub

- Largest market share (Grubhub, Seamless, MenuPages, Allmenus, DiningIn, Restaurants on the Run)
- 5.6 million active users in past 12-months
- Delivery service
- Expensive (commissions)
- Complaints about delays and inefficiencies
- Best for newer brands trying to increase business/awareness

# Caviar

- Part of Square network
- Excellent customer support
- Curated restaurants
- High-quality presentation
- Coordinated promotions
- Highest market penetration in San Francisco
- Best for high-quality brands

# White-Label Remote Ordering

## Pros

- White-label branding
- Custom mobile apps
- No commissions
- More in-depth features
- POS integrations
- Merchant has control of data

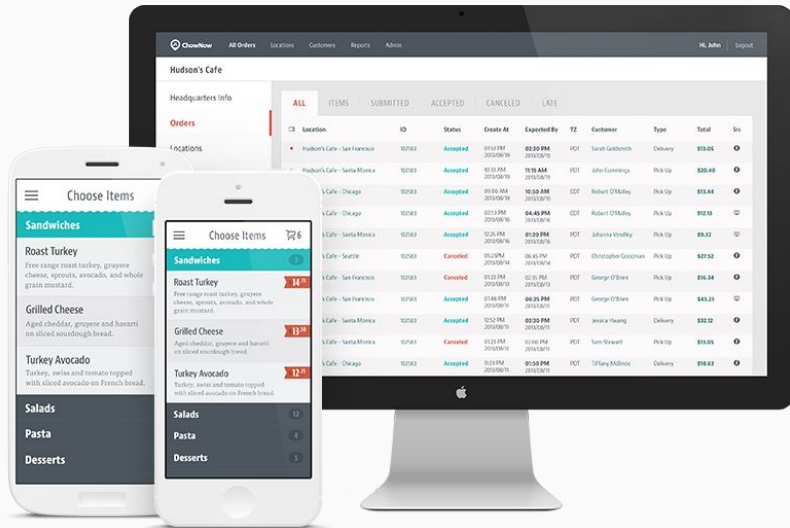

## Cons

- No discovery network

# ChowNow

- User-friendly design
- Excellent customer support
- Custom mobile app
- Ownership of customer data
- No commissions
- Delivery via UberRush
- Yelp, Google, Facebook, Bing, and Zagat integrations
- Best for new and established brands alike

# Zuppler

- Revel POS, Micros, Aloha, Par, POSitouch integrations
- Hybrid aggregator/white-label
- Highest market penetration in Pennsylvania
- Transparent pricing
- No commissions
- Best for brands requiring POS integration

# Remote Ordering Built-In to POS

## Pros

- Central management
- Less expensive

## Cons

- No discovery network
- Everything must be managed in-house
- No mobile app (in most cases)
- Requires mobile-friendly website

# Revel

- Built-in remote ordering + integration with single-app aggregator (Zuppler)
- Delivery management
- Mobile (line-busting, tableside ordering, pay-at-table)
- White-label mobile app
- Enterprise level solution
- Best for brands that want it all

\*Promo for new channel partners

# Remote Ordering

## Design, Implementation, and Deployment

- Tradeoffs are inevitable
- Choose POS system first
- Check market saturation for single-app aggregators
- Start slow - each implementation has growing pains
- Big brands better fit for strict white-label
- Run the numbers (in-house vs third-party delivery)
- Multiple iPads a must
- Mobile friendly website a must

# Remote Ordering Examples

# Homeroom

- Using multiple systems (ChowNow, Caviar, Eat24, Postmates, Doordash, OrderAhead)
- Some services don't require partnership
- Two tablets max for efficiency (Chownow, Caviar)
- Each new service had growing pains
- Support and communication are key
- Would love POS integration

# Emporium Thai

- Using multiple systems (ChowNow, Caviar, Grubhub, Postmates, etc...)
- The more exposure the better
- Separate tablet for each service
- Hire dedicated online ordering mgr
- Support and communication are key
- Grubhub gives most exposure
- UberEATS/UberRUSH best delivery
- Goal is to funnel customers to white-label solution (ChowNow)
- Would love POS integration
